

Got Shade?

Get Shade Clips™

Patent Pending

- Shade clips (patent pending) are a unique new functional accessory that fits on any curved brimmed ball cap or visor.
- Shade Clips provide a real solution by reducing or eliminating the glare from the sun around the eyes that ball caps fail to do. Most people bend their cap to try and achieve as much shade as possible but it just does not block enough. With Shade Clips you will notice a big difference giving you the protection and shade from the sun's damaging rays making it much easier to see. Perfect for driving, walking, playing or watching sports.
- Shade Clips help protect sensitive areas around the eyes against wrinkles and skin cancer.

Shade clips are totally indestructible, made from recycled material and manufactured in the USA. They are non toxic, have no sharp edges, are too large for kids to swallow, and have an indefinite shelf life.

- Great market potential as there are millions of hats sold every year and everyone could use a pair of Shade Clips.
- Shade Clips have a MSRP of \$7.95 for a 1 pair pack and are available in 3 colours black, white and khaki. Cost is only \$2.75 giving great margins. Minimum order of 144 (less than minimum \$3.25ea) Volume greater than 1000, \$2.50.

FREE Custom PMS colours and custom branding are available on 5,000 pair or more.

**Goes on in seconds,
just slide on brim
from front to back**
